Applied Metacognition
**Applied Metacognition**

Metacognition plays a pivotal role in teachers' professional development. However, the absence of effective instrument for measuring teacher metacognition has hampered researches in this area.

**Assessing teachers' metacognition in teaching: The Teacher ...**

1 Definition. Metacognition can be considered a synonym for reflection in applied learning theory. However, metacognition is a very complex phenomenon. It refers to the cognitive control and monitoring of all sorts of cognitive processes like perception, action, memory, reasoning or emoting.

**Metacognition - EduTech Wiki**

Metacognition plays an important role in all learning and life experiences. Beyond academic learning, when students gain awareness of their own mental states, they begin to answer important questions:

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen’s d). In his ground-breaking study “Visible Learning” he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects. Hattie found that the average effect size of all the interventions he studied was 0.40.

Extremism means, literally, “the quality or state of being extreme” or “the advocacy of extreme measures or views”... The term is primarily used in a political or religious sense, to refer to an ideology that is considered (by the speaker or by some implied shared social consensus) to be far outside the mainstream attitudes of society. It can also be used in an economic context.
