National Environmental Assessment Reporting System (NEARS ... Environmental assessment (EA) is the assessment of the environmental consequences (positive and negative) of a plan, policy, program, or actual projects prior to the decision to move forward with the proposed action. In this context, the term "environmental impact assessment" (EIA) is usually used when applied to actual projects by individuals or companies and the term "strategic environmental ... Environmental impact assessment - Wikipedia
the Board issued environmental assessment guidelines, requiring that information to support the proposal be provided in the form of an Environmental Effects Report (EER). A draft of the EER was submitted to EPA Tasmania for review against the guidelines prior to finalisation, and the final EER was accepted by the Board on 13 March 2018.

Environmental Assessment Summary of Comments
The goals of toxicity testing are to identify possible adverse effects of exposure to environmental agents, to develop dose-response relationships that can elucidate the severity of effects associated
with known exposures, and ultimately to predict the effects of exposure of human populations.
