The stretch reflex (myotatic reflex) is a muscle contraction in response to stretching within the muscle. It is a monosynaptic reflex which provides automatic regulation of skeletal muscle length. When a muscle lengthens, the muscle spindle is stretched and its nerve activity increases. This increases alpha motor neuron activity, causing the muscle fibers to contract and thus resist the...

When a doctor tests your reflexes, she looks not only for movement of the stimulated muscle but also for speed and briskness of reaction. Slow or diminished reflexes can indicate a localized problem or a remote disease affecting neural function, likely near the spine. Abnormal reflex response ranges ...

Some children gag and vomit. If your child has a similar response to some foods, talk to her doctor. She may have a sensitive gag reflex, which the doctor can discuss with you. As you introduce new foods to your child, you will have to be careful about introducing combination baby foods with meat and vegetable bits.

this reflex are “retained,” through childhood and into adulthood. One of the most common results of retained STNR is the inability to comfortably sit still.

**Balancing to Resolve Symmetrical Tonic Neck Reflex**
Research has shown that some patients with IBS have an over-reactive gastrocolic reflex with high pressure contractions in response to meals. 2 Simply eating or drinking can trigger this exaggerated reflex resulting in pain, cramping, diarrhea or constipation. Several patients with IBD have coexistent symptoms of IBS 3 so this exaggerated gastrocolic reflex can occur in patients who have Crohn ...

The vasovagal response is an automatic reflex that stimulates your vagus nerve. It can affect your central and peripheral nervous system, as well as your cardiovascular system. When triggered, the vagus nerve sends a message to the brain that may cause a sudden drop in your blood pressure and heart rate.

**Overview of the Vasovagal Reflex - verywellhealth.com**
Yashica 44. Yashica introduced the model 44 in 1958 as Japan's first 4x4 TLR.. The camera was offered in several color options, but the gray version (no doubt inspired by the gray Baby Rolleiflex of 1957) proved to be the most popular.. The Yashica 44 features crank film advance, with automatic frame spacing after the user aligns frame number "1" in a red window.
